**Attention:** Mike Chester, President

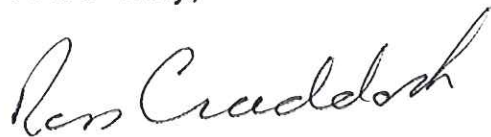

*Mike*  
Dear Mr. Chester,

I just wanted to take this opportunity to thank you and your staff for the excellent support you once again provided Alliant Techsystems in the production of the HOTTorp training torpedo for the Canadian Government contract.

The numerous changes and delays we faced with respect to the contract and design, caused your company to have to adapt rapidly to these adjustments and still meet the critical delivery deadline the contract demanded. In all instances, as I was able to view personally, the professional approach of your personnel and their willingness to "pitch in" ensured we met all the contractual requirements. The proof of that success was during the visit to your facility of the Department of National Defence (DND) inspection personnel, when the quality of the product was commented upon most favourably by the leader of the team.

Again, I wish to express my personal thanks for a job well done and ask that you pass my comments and compliments to all who were involved in the HOTTorp activity.

Yours truly,

W.R. Craddock  
Canadian Representative
